

Thanks for choosing RAKwireless!

WisNode Tag is an ultra-slim LoRaWAN GPS tracker for the TrackIt ecosystem. With built-in GNSS, an accelerometer, Bluetooth setup, and a 1000 mAh rechargeable battery, it helps you track people and assets across wide-area LoRaWAN networks.

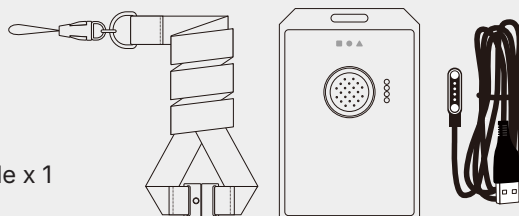

Package Contents

WisNode Tag Device x 1

Lanyard x 1

4-Pin Magnetic Pogo Pin USB Cable x 1

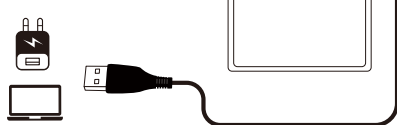

Getting Started

Step 1

Charge

Connect the magnetic USB cable to a USB power source. Red LED = charging.

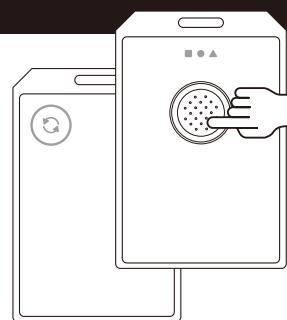

Step 2

Power on & buttons

To power on: hold the front button 3 s (three beeps).

Front	
Hold 3 s	Power on / off
Press	Locate & send
Tap 3×	SOS on / off
Hold 10 s	Factory reset
Rear	
Press	Restart

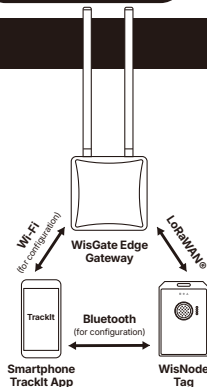

Step 3

Pair with TrackIt

With RAK WisGate Edge and TrackIt:

1. Turn on Bluetooth on your phone.
2. Connect to your WisGate Edge Wi-Fi.
3. Open TrackIt and tap +.
4. Press the rear button (or hold the front button 3 s if off). Tap Start Pairing within 30 seconds.
5. Sign in to the gateway — your tag is added automatically.

Using another gateway? See docs.rakwireless.com

Step 4

Pick a battery mode

In TrackIt, choose a battery mode:

Mode	Use when
Static	Fixed-interval location reports — stable tracking, best battery life
Monitor	More frequent location updates — closer status monitoring
Movement	Reports on movement, vibration, shaking, or fall

Step 5

Go Wireless

Unplug. Ready to use.

LED Indicators

■ RED	■ Charging
● GREEN	■ Starting
...	... Joining
...	... Connected
▲ BLUE	■ Active
○ Off	○ Sleep
■ Solid	... Fast
	... Slow
	≈ Breath
