## Getting Started

### Step 1

Remove the rubber cap and screw on the LoRa antenna securely.

### Step 2

#### 2a Solar Battery Powered

Connect the solar panel to the left SP11 on the Solar Battery Lite. Then, connect the power cord from the middle SP11 to either SP11 on the repeater.

#### 2b DC Powered

Insert the keyed power plug into either SP11 connector, and tighten. Plug the adapter into the AC socket.

**⚠** Do NOT connect the DC adapter to power while the 18505 batteries are installed inside the device. This may cause damage to the device or batteries. Always choose one power source at a time.

### Step 3

→ Download/open Meshtastic App  
→ Pair using PIN 123456

### Step 4

Select your region

**⚠** The device will NOT function until the region has been set via the Meshtastic App.

### Step 5

Mount the bracket on the wall with screws or use the clamp to attach it to the pole. Ensure the "UP" direction is correct.

### Step 6

Align the tab with the slot, then slide and click the device into place.

## Welcome to WisMesh

This guide helps you set up your Meshtastic device in minutes.

Thanks for choosing WisMesh
